

SAFETY PRACTICES - EXTENSION CORDS & POWER STRIPS

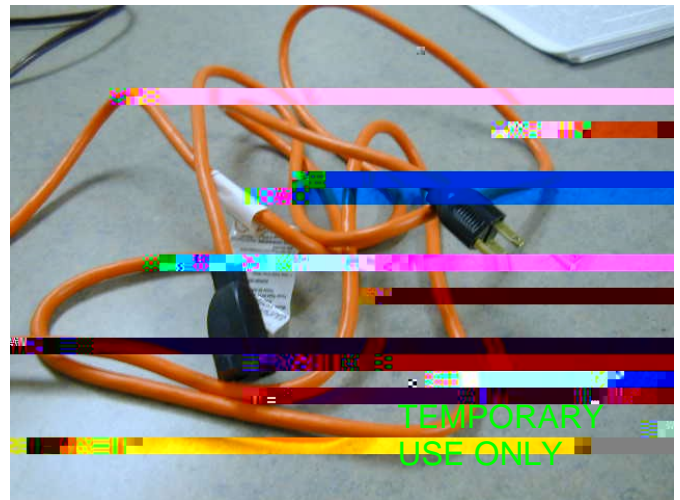

Do NOT plug power strips into an extension cord.

NEVER use lightweight, ungrounded (2 PRONG) cords like pictured.

Do NOT plug power strips into power strips.

Grounded (3 PRONG) extension cords are okay for temporary use (MAXIMUM 30 DAYS). An extension cord under a desk with a computer plugged into it is NOT considered temporary.

The best practice is to use a power strip that is the correct length!
