

- 3M™ Command Strips work best to avoid damage to the walls. 3M™ makes both hooks and Velcro® style attachment aids. Be sure to check the instructions and weight load of the product, so that your hanging item doesn't fall off and get damaged.
- ✘ When it's time to remove the strips, put in a maintenance request and Plant Services will take the strips off. Do NOT yank them off the wall! (There's a method for taking these off, including using dental floss for broken strips.)
